

**RELATECH: OKT SRL, SPIN-OFF OF THE RELATECH GROUP,
PARTICIPATES IN THE EVENT *SuperScienceMe -reSearch is your
Resource* - RESEARCHERS 'NIGHT 2022-2023**

30 SEPTEMBER 2022 CALABRIA

Initiative promoted by the European Commission

Milan, 30th September 2022

Relatech S.p.A., *Digital Enabler Solution Know-how (DESK) Company* and innovative SME listed on the Euronext Growth Milan market (Ticker: RLT), announces that, today, **OKT S.r.l.**, a spin-off of the Relatech Group, will take part in the **SuperScienceMe event - reSearch is your Re-Source - Researchers' Night 2022** which will take place on the campus of the **University of Calabria**.

The Researchers' Night is an initiative promoted by the European Commission since 2005 that involves thousands of researchers and research institutions from all European countries every year. The goal is to create opportunities for researchers and students and even ordinary citizens to meet, to spread scientific culture and knowledge of the research professions in an informal and stimulating context. Events include live science experiments and demonstrations, exhibits and guided tours, educational lectures and seminars, and much more.

The University of Calabria joined the initiative with the *SuperScienceMe* project. "*Research is an inexhaustible (re) source of inspiration to make Europe better for the next generation*" is the message that *SuperScienceMe* aims to convey to new generations of students.

OKT Srl, a spin-off of the Relatech Group, is present with an information stand within the **Innovation Space** area. At the stand, the Relatech team of professionals will present some prototypes created as part of some research projects: **CALIPSO**: *Complex Autonomous Learning based on Innovative Pattern Searching & Optimization* and **EMPHAsis Evolution**: *Effective Malware Prevention Through Honey-pot Assisted Analysis*.

CALIPSO is a Car Damage Detection system which, by combining Computer Vision and Deep Learning techniques, allows you to automatically locate and quantify the damage on motor vehicles, also returning an estimate of the repair costs.

EMPHASIS Evolution is a framework based on the use of honeypots for the prevention, capture and morphological analysis of malware that attack computer systems and industrial production.

The OKT team will also have the opportunity to give young university students an overview of the Relatech Group and to present the solid collaboration that the Company has with research centers and universities (including the University of Calabria, ICT SUD, CNR, Magna Graecia University, just to name a few) and the professional opportunities within the Group for young talents.

SuperScienceMe intends to project the new generations towards a future in research both in the academic and industrial fields. The heart of the project is represented by the initiatives called *Researchers at Schools*, in which researchers from UNICAL University and CNR will meet students to illustrate the five *EU Missions* on which the event is focused: Climate Change, including Societal Transformation; Cancer; Healthy Ocean, Seas, Coastal and Inland Waters; Climate-Neutral and Smart Cities; Soil Health and Food.

More information on the event is available at the [link](#).
