

PPRESS RELEASE

**RELATECH – GRUPPO SIGLA
PARTICIPATE IN THE REALTER OPEN LAB,
THE LABORATORY DEDICATED TO THE REALTER BIOMEDICAL
PROJECT**

- **Realter, which is among Relatech Group's innovation projects, is an Augmented Reality Device dedicated to reproducing visual impairment to support rehabilitation.**

Milan, 24th of July 2023

Relatech S.p.A., *Digital Enabler Solution Know-How (DESK)* Company, listed on the Euronext Growth Milan market (Ticker: RLT), announces that, through **Gruppo SIGLA**, it participated in the Realter Open Lab, organized by the Chiossone Foundation. The workshop dedicated to the biomedical project Realter was held on Friday, July 21, at the **Department of Architecture and Design of the University of Genoa**, as part of the Homer Project Final **Event**.

Realter, an innovative project launched at the end of 2021 in which Gruppo SIGLA contributed within a broad partnership that also involved **Ggallery, ETT and FOS Greentech**, in collaboration with the **University of Genoa** (DIBRIS - Department of Informatics, Bioengineering, Robotics and Systems Engineering), IIT (Italian Institute of Technology) and **Fondazione Chiossone**; led to the creation of a wearable device based on modern **Virtual and Augmented Reality** technologies that enables professionals in the field of visual, sensory, motor and cognitive disabilities to experience the **"real world"** through the visual perspective of visually impaired people and to devise personalized recovery strategies.

As part of the project, Gruppo SIGLA developed a **Data Analytics system** in order to collect data and provide useful information to professionals in the field, who in this way can develop increasingly precise and effective rehabilitation pathways oriented toward personalized medicine.

The Realter Open Lab is an important milestone for the project, as it allowed to show the features and benefits of a state-of-the-art wearable device that through modern Augmented and Virtual Reality technologies can improve visual rehabilitation procedures.

Silvio Cosoleto, **Chief Operating Officer Relatech**, commented, *"We are very pleased to be able to support through the Realter project such an important cause as sensory, visual, cognitive disabilities. Technology, and in this case augmented and virtual reality, become a highly innovative educational-rehabilitation tool that enables visually impaired people to improve their visual abilities. Increasingly, technology is delivering its benefits within the world of healthcare, opening new horizons in the medical field and new opportunities for patients. The Realter project is part of the many research and development projects carried out by the Relatech Group in collaboration with its scientific ecosystem with universities and research centers, and is also evidence of the constant investments towards R&D activities as demonstrated in the Group's ESG Report, an expression of our commitment to care and respect for People and the Environment. Realter, as well as the Group's other projects, continually contribute to further nurturing the [RePlatform](#) digital cloud platform, the backbone of our business strategy."*
