

PRESS RELEASE

Relatech debuts at SPS Nuremberg 2024 with cutting-edge solutions based on Generative Artificial Intelligence and advanced Cybersecurity solutions

Relatech will be present at the fair with its digital skills strengthened by the multiple features offered by Inductive Automation's Ignition platform and Sepasoft's advanced MES, both distributed and supported by the company in Germany and Austria.

SPS Nuremberg
12-14 november 2024
Hall 5 – stand 120

Milan, 7 November 2024

Relatech S.p.A., *Digital Enabler Solution Know-How (DESK) Company* that has become part of the BREGAL Unternehmerkaptal galaxy, will participate in the **SPS Fair in Nuremberg**, one of the most relevant international events for industrial automation, which will be held **from 12 to 14 November 2024**. This presence at SPS represents a strategic opportunity for Relatech to further expand its presence in European markets.

The initiative is part of a broader international expansion project, which the Relatech group has already launched, and which becomes even more concrete with the recent signing of the distribution agreement for Germany and Austria of **Inductive Automation's SCADA Ignition and Sepasoft's MES platform**. This agreement further strengthens the collaboration already underway in Italy with EFA Automazione, a Relatech Group company and exclusive distributor of Ignition in our country.

Thanks to this positioning, Relatech intends to offer innovative solutions in the field of industrial automation to an international clientele, confirming its role as a digital technology leader in an increasingly global context.

In **Hall 5, Stand 120**, Relatech will present innovative solutions that apply the power of **Generative Artificial Intelligence** to industrial processes, helping to redefine the future of smart manufacturing. These advanced technologies, geared towards connectivity and data management, represent a significant step forward in the industry and in the convergence of OT and IT.

An example of this is the revolutionary machine, capable of responding in real time to specific voice requests thanks to the integrated **RexAI artificial intelligence** technology. It is a digital

assistant developed by Relatech that not only allows you to communicate with machines in natural language, but also allows access to the company's information assets and general context. The machine, when queried, provides timely information on energy consumption, performance and so on, in different languages, offering an unprecedented interactive experience. Equipped with a robocentric island, the machine, in addition to providing analytics, will delight visitors with cherry-heart chocolates, demonstrating the efficiency and versatility of the system.

In addition to this innovative machine, visitors will be able to explore other advanced technological solutions that are making the dream of the manufacturing industry of the future a reality:

1. **Industrial connectivity**, integrated with **HMS solutions**, such as Anybus Defender gateways for the advanced protection of machines and plants from cyber attacks.
1. **Sepasoft's Manufacturing Execution System (MES)**: Optimizes manufacturing processes and provides real-time information for data-driven decision-making.
1. **Ignition by Inductive Automation**, a *limitless platform* that revolutionizes traditional SCADA systems, bringing IT and OT together to create an interconnected and intelligent manufacturing ecosystem.

All this will be visible from 12 to 14 November 2024 in Hall 5, Stand 120.

To make an appointment for interviews with:

1. Pasquale Lambardi, CEO of the Relatech Group
2. Franco Andrggetti, Managing Director EFA Automazione, Relatech Group

[Relatech](#) (ticker RLT ISIN IT0005433740), Digital Enabler Solution Know-how (DESK) Company listed on the Euronext Growth Milan market since June 2019, has been active for over twenty years in frontier Digital Enabler technologies, such as Cloud, Cybersecurity, IoT, Big Data, Blockchain, Machine Learning. Relatech is the reference partner for the Digital Innovation of companies and leads a group of companies highly specialized in Digital Enabler Technologies united by the common mission of supporting customers in the digital transformation process. Relatech constantly invests in Open Innovation with an intense R&D activity carried out by internal hubs in collaboration with universities and national research centers. Thanks to the RePlatform digital platform and the know-how deriving from the ecosystem of scientific and technological partners, Relatech develops digital services and solutions capable of innovating the business model of its customers, ensuring sustainable business growth for all those companies that see the digital innovation process as the key to current and future success.

#BuildYourDigitalFuture

EFA Automazione SpA, part of the Relatech group, has been operating for 30 years in the field of industrial automation with products, solutions and know-how dedicated to the world of connectivity for system integration. An absolute forerunner of some of the issues that permeate the current 4.0 scenario, EFA Automazione has anticipated many technological trends, including that of IoT, which it currently rides as a protagonist by offering cutting-edge solutions in the use of the cloud and wireless communication in all its architectural forms. EFA Automazione is a unique reality in the national industrial landscape, able to offer a strategic advantage to all stakeholders in the ecosystem of which it is part: customers, system integrators, partners and suppliers. The synergy with Relatech makes EFA Automazione a hub equipped with 360-degree skills, technologies and assets in the field of IT/OT convergence, through which companies - both SMEs and large companies - can access the most advanced digital technologies to solve all the needs of connectivity, collection, analysis and protection of data and machines in order to increase their margins and compete better and better on their outlet markets.
