PRESS RELEASE

360° cyber resilience: Relatech integrates Pluribus One's Seer Box® into its CloudSecurity offer

Milan, 18 December 2025

Relatech S.p.A., a leader in digital solutions, announces that it is expanding the suite of cybersecurity services within its **Relatech CloudSecurity** offering, with the integration of **Seer Box®**, the **Application Detection and Response (ADR)** solution developed by **Pluribus One**, a company specializing in cybersecurity and artificial intelligence.

The agreement expands the portfolio of innovative solutions dedicated to cybersecurity, extending the scope of **Detection & Response** to the **application layer**, which is now one of the main risk vectors in the modern digital scenario.

With the integration of Seer Box®, Relatech strengthens its offer on: extends Detection **& Response capabilities** to the heart of applications, offering:

- **Deep visibility** on threats, abuses and anomalies **within Web Apps and APIs**, with inspection focused on application behavior.

- **Intelligent detection and response** to **anomalous patterns and targeted attacks**, with automation and operational guidance for security teams.

- **Support for compliance paths** (e.g. **NIS2, CRA, ISO/IEC 27001, PCI-DSS**) thanks to technical evidence and enhanced traceability of events.

- **Competitive advantage for enterprises and MSSPs**: **Multi-layered protection** that can be integrated into existing SOC and SecOps processes to reduce exposure and response times.

"*The integration of Seer Box® into Relatech's offering represents an important strategic step to strengthen our ability to support customers in a **360-degree cyber resilience journey, extending visibility to the application context with extremely specialized technology,**" comments* Andrea Ferrazzi, CloudSecurity Business Unit Manager. *"Application protection is now a fundamental element to ensure business continuity and reduce business risks.*"

Davide Ariu, CEO of Pluribus One, adds: "*We are proud of the collaboration with Relatech, which allows us to bring **Application Detection and Response** to an increasing number of organizations. With Seer Box®, we are making a new frontier of application security a reality.*"

Thanks to this partnership, Relatech confirms its mission to enable companies in the **digital transformation** process with advanced, secure and innovation-oriented solutions.

The partnership is part of Relatech's broader strategic design, aimed at building solid and collaborative relationships with valuable technological partners. The goal is to create a harmonious ecosystem capable of fostering the digital transformation of business models and ensuring lasting and sustainable business growth of companies.

Relatech is a leading provider of enabling digital solutions, active in the markets of Digital Transformation, Industrial Automation and Cybersecurity, supporting SMEs and large companies in their innovation and digital transformation paths, both in Italy and abroad. It offers end-to-end solutions — from the first digital interactions with the outside world to industrial automation — based on advanced technologies such as Artificial Intelligence, Cybersecurity, Cloud, IoT and Big Data, as well as Advisory, ICT Training and Data Analysis services, promoting responsible innovation and sustainable growth. Thanks to a solid R&D ecosystem and strategic partnerships — including Microsoft — the company leads companies towards a Digital Renaissance, in which technology is accessible and enabling for all.

PLURIBUS ONE is a European cybersecurity vendor specializing in software security. The company takes an integrated approach that combines technology, training, and professional services, supporting organizations in securing applications throughout the software lifecycle. The flagship product is SEER BOX (seerbox.it), an Application Detection & Response (ADR) platform designed for detecting and responding to attacks against Web Applications and APIs. SEER BOX extends traditional application protection capabilities by offering visibility, behavioral analysis and targeted detection of truly impactful attacks. Based on a cloud-native architecture, the solution guarantees simple and non-invasive deployment, full control of data and native integration with SOC and MSSP ecosystems thanks to advanced automations and extensive APIs. The design is oriented towards the principles of privacy and data sovereignty by design, in line with European regulatory requirements. PLURIBUS ONE is ISO/IEC 27001 certified and is accredited by ECSO as a vendor of "Cybersecurity Made in Europe" solutions.
